

FLEX CHANNEL TRIM

MEETING YOUR REQUIREMENTS FROM START TO FINISH

ABOUT US

Rochester Specialty Products' (RSP) Flex Channel provides a resilient, compressible barrier between stationary & moving parts for maximum resistance to dust, air & water infiltration.

- Easier operation with Flex Channel in place
- Available in several widths to accept different types of sliding panels & frames
- Can be constructed to meet specific design & performance criteria

RSP window channel seals are used in **Marine, Automotive, RV & Aeronautic** industries.

RSP wire carriers covered with woven pile fabric create u-shaped channels that retain and seal sliding panels on linear surfaces. They are flexible in order to accommodate a tight radius & for maximum ease of operation.
